

AI501
WRITTEN EXAM
Multiple choice questions and other question types
Limited aids

The exam is digital and therefore you must bring your own computer and also bring a tool to digitize handwriting.

[SDU's general examination rules apply](#). In addition, the following specific examination rules also apply.

Specific rules

The DE-Digital Exam System (<https://digitaleksamen.sdu.dk/>) is used at the exam. See guide to the system at mitsdu.dk and on the following pages. You can expect to see your exam in the DE-Digital Exam system no later than 7 days before the exam date. If you cannot see your exam by then, contact your study immediately.

It is recommended that you try an MCQ demo exam well in advance of the exam to ensure that the MCQ system works on your computer. Click on "Try a demo exam" in the DE – Digital Eksamen system.

Eduroam (<http://wifi.sdu.dk/>) and **Exam Monitor** (<https://sdu.exammonitor.dk>) are used. See separate guide to Exam Monitor and possibly detailed installation instructions at <https://mitsdu.dk/exammonitor>.

Examination aids

The exam is with limited aids. Only the following aids are allowed:

- language translation dictionaries (e.g. Danish/English, Danish/German etc) in "ordbogsprogrammet" (the dictionary programme) from <http://www.ordbogen.com/> in electronic form. The browser version is not allowed. See the complete list of which dictionaries are allowed in the separate "*Instruction to ordbogen dot com*". All dictionaries other than the allowed dictionaries must be switched off in "ordbogsprogrammet" (the dictionary programme).

Internet is not allowed. However, you may access the course page in itslearning to open the "DE-Digital Exam" system and complete any tests within the system.

At the exam start

- Turn off file sharing services (OneDrive, Google documents, Dropbox, AirDrop etc.) and chatbots (ChatGPT, Gemini, Copilot etc.) before the exam starts. It is considered cheating if they are running when the exam starts.
- **When the exam begins, you must start by opening the digital version of the multiple choice test and the word processing program that you wish to use during the exam, and maximise them on your screen. The multiple choice test, the word processing program, and the exam set must remain maximised on your screen throughout the entire exam, or alternatively be placed side by side and fill the entire screen. Only allowed programmes and aids may be visible on your screen.**

The examination papers

The exam consists of two parts. One with multiple choice questions (part 1) and one with questions that require answers in form of text/drawing (part 2).

Part 1: Multiple Choice

- Part 1 is distributed electronically in the "DE – Digital Exam" system at the beginning of the exam. You must enter a PIN code/password, which the exam invigilators will write on the board shortly before the exam starts, in order to access the exam set.
- The questions will be presented one at the time and you can navigate forth and back freely between the questions. Your answer will be saved when you navigate to the next question.
- Your answer must be fully entered into the DE – Digital Exam system before the exam time ends.

Hand in of part 1

- When you are ready to submit your answer, click "*Aflever/Complete*".
- The multiple choice test can only be taken **once**. If you click "*Aflever/Complete*" and confirm that you wish to submit, your test will be finalised, and you will no longer be able to make changes to your answer.
- Once you have submitted your answer, the test will indicate that it has been submitted, and you will receive a receipt.
- **You must show your receipt to the exam invigilators.**

Part 2: Other questions

- The examination paper for part 2 will be handed out electronically as a PDF-document in the "DE-Digital Exam" system. You must type a pin code/password to get access to the examination paper. The invigilators will inform you about the pin code before the exam start.
- If you use a word processing programme for the entire or part of your answer, it is recommended that you use the document template (format: Word and Writer) which will be available electronically at the exam start in the "DE-Digital Exam" system. Use of the template is, however, optional.
- First save the template with your **examination number** and **course name** after you have downloaded it.
- Your **examination number** must be at the header of every page in your answer.
- It is allowed to use digital pen of the recommended type¹ and hand scanner¹, MS Paint (Windows), Paint X (macOS) and Pinta (Linux). It is not allowed to use digital camera or webcam or other methods to digitalize your answer.
- Software for the digital pen/hand scanner and MS Paint (Windows), Paint X (macOS) or Pinta (Linux) is allowed to be open at the same time as the template. You cannot use or read any kind of prefabricated material from these software. Everything you use must be made during the exam.
- You can only close the word processing programme when you hand in your answer or when the invigilators have given permission to do so.
- If you wish to hand in your answer before the exam ends, contact the invigilator and the invigilator will supervise it.

¹ A hand scanner is defined as a silent scanner which does not bother other participants at the exam and where scans can be transferred to the computer via cable (transfer via WIFI or memory card is not allowed). Handheld scanners are silent because the scanning is done by moving the scanner across the paper by hand. Thus, there is not an engine which is noisy when the scanning is made. If there are other silent scanners, they will also be allowed. Here are a few examples of scanners which will be allowed at examinations at the Faculty of Science (examples are not exhaustive): IRIScan Mouse: <http://www.irislink.com/EN-US/c1723/IRIScan-Mouse-Executive-2---Mouse-Scanner--Win---Mac.aspx>, IRIScan Book 3 (Windows and Mac): <http://www.irislink.com/EN-US/c1648/IRIScan-Book-5---IRIScan-Book-5-Wifi---Book-scanner.aspx>. IT-service provides support for IRIScan Book 3 to the same extent as for the recommended digital pen.

Hand in of part 2 assignment

- **Your answer must be handed in as a single PDF document.**
- You hand in your answer via the "DE-Digital Exam" system.
- After uploading your answer, you must check, that your **document can be opened**, and that it is the **correct** document you have handed in.
- It is **your own responsibility** to hand-in the correct document.
- **Notice:** you can only hand in your answer **once** and it is **binding** when you press submit. Therefore, only submit your answer when you want to finish your exam.
- You will receive a receipt on your screen when you have submitted your answer. The receipt will also be sent to your student e-mail account.
- **To be able to leave the examination room you have to show your receipt on your screen.**

Hand out and submission of assignments in the DE-Digital Exam system

Before the exam starts you can see your exam in the system and exam information.
